

Making Blood

You will need:

500 ml beaker

Measuring cylinders

Stirring rod

'Plasma'
(yellow water)

'Red blood cells'
(coloured cereal)

'Platelets'
(marshmallows)

'White blood cells'
(pom poms)

Work out the **rough** volume of each component of blood you need to add to fill the 500ml beaker.

Percentages of each component are included below:

Plasma: 55%

Red blood cells: 44%

Platelets and white blood cells: 1%

Add each component to the beaker in the order listed above.
Give your mix a good stir with a stirring rod!
